# THE STORY

It was a normal day inside the mine. The heat was unbearable, the torches barely lit the caves and the bats were lurking in the ceiling.

After finishing your lunch, you get in the mine cart and prepare the long road to the deepest caves, where the darkness reaches it's peak and the air is scarce. It's also where is the most valuable resource of the mine: gold.

Immediately after arriving, you grab your pickaxe and start working on the main vein.

Not worrying too much about safety, you stroke as hard as you can on the wall.

Suddenly, you hear a strange sound. Small at the beginning, now the sound resonates around the entire cave. The walls begin to crack, dust start falling from the ceiling, and the bats are running away. **THE MINE IS COLLAPSING!**

Quickly, you get in the mine cart and undertake your long escape to the surface.

You don't have a second to lose. Just steps behind you the path starts to be blocked by giant boulders falling from the ceiling. Will you be able to escape in time?

# ABOUT THE GAME

Mine Escape is an adventure game where the main objective is to escape a mine on the verge of collapse.

In the main game, the player is set on the mine rails and it must avoid obstacles and pitfalls.

It requires a lot of agility to master the game. The player must react quick and flawlessly. Any mistake would cost it's life.

# HOW TO PLAY

Playing Mine Escape is very easy. The mine cart moves by itself at constant speed, so you only need to worry on avoiding obstacles.

To avoid obstacles, the only movement you have available is to jump. In order to jump, tap anywhere on the screen. It couldn't be any easier, right?

You have to time your jump very carefully, since there are a lot of obstacles close from each other and you could jump straight into one of them.

# GAME OVER

If you fall off a pitfall or got hit by an obstacle, you will die. Don't worry, it's not the end of the world. You can restart as many levels as you can on the last level you were.

The key is perseverance. The first levels are relatively easy and made for the player to get accustomed to the game. The later levels are really challenging and guaranteed that you will die a lot, so keep trying until you succeed!

# THE OBSTACLES

## Pitfalls

The collapse of the mine has compromised the structural integrity of the cart rail and has been broken on many areas. Avoid falling on it's holes!

## Rocks

Big chunks of rocks have fallen from the ceiling and landed on the cart rail

## Bats

Are you familiar with the phrase “the rats are the first on abandon the ship”? Well, bats are like rats with wings

# THE OBSTACLES

## Empty carts

On their despair, many miners jumped out of their carts and began running towards the surface. They will come at you fast, so you must be quick to react

## Boulders

Even larger versions of the rocks, these huge chunks of stone will come at you rolling and bouncing. Be careful, some boulders have to be passed by jumping over them and others by passing beneath them. You must be quick to decide.

# GAME MODES

## Adventure Mode

This is the standard mode of Mine Escape. The player must complete 150 levels to escape the mine and reach the surface. If you die on a level, you will restart at the beginning of that level. The levels begin relatively easy, but as you make progress they become harder and harder.

## Hardcore Mode

In this mode you have to complete the exact 150 levels of Adventure Mode. The difference is that if you die, you will restart at the beginning of level 1. This mode is made for hardcore players that want a truly difficult challenge. You can also compete to obtain the high score of the Hardcore Mode Leaderboard

## Endless Mode

This mode is for casual players that are looking for a short playtime. There are no levels, just an endless trail that is randomly generated until you die. The difficulty raises very quickly so it's very likely that you will last only a few minutes. You can also compete to obtain the high score of the Endless Mode Leaderboard
